[Intro]

[D] [A] [A] [D]  
[D] [A] [A] [D] [D7]  
[G] [G] [A] [D]

[V1]

[D]  
The song of a meadowlark  
[A] [A]  
Singing from a signpost, singing from the top of the  
[D]  
tree  
[D]  
Hey, little meadowlark  
[A] [A] [D]  
Singing there for someone, some birdie other than me

[Chorus]

[A] [D][D7] [G]  
Meadowlark sing, meadowlark sing, meadowlark sing  
[A] [D]  
Sing sweet meadowlark, sing

[V2]

The song of a meadowlark  
Hidden in the prairie grass  
Such a very fast melody  
Not to be mistaken  
With the red-winged blackbird, flicker or the  
chickadee

[Chorus]

[A] [D][D7] [G]  
Meadowlark sing, meadowlark sing, meadowlark sing  
[A] [D]  
Sing sweet meadowlark, sing

[Bridge]

[G] [D]  
The study of birds? Ornithology!  
[G] [D]  
Ornithological studies have revealed to me  
[G] [D]  
That the song of a bird primarily  
[G] [A]  
Indicates one of two things  
[G] [D]  
Thing one – Hey you, get out of my tree!  
[G] [D]  
Thing two – I'm so handsome ladies look at me!

[G] [D]  
But it seems to me ornithology  
[G] [D]  
Has overlooked a third possibility  
[G] [D]  
Singing simply for the joy of a melody  
[G] [A]  
Maybe like a meadowlark sings

[D] [G] [A]  
For the joy of music you sing out your song  
[D] [G] [A]  
Meadowlark, I'd like it if I could sing along  
[G] [D] [A]  
But your song is filled with such complexity  
[G]  
That I'll content myself to sit and listen  
[A]  
Beneath the willow tree

[Solo]
